

# DELIVERING SMART STORMWATER SOLUTIONS FOR OCEAN EDGE PLUMBING

## Client Profile

Ocean Edge Plumbing & Gas - a Mandurah-based company with 25 years of experience, specialising in plumbing solutions for commercial, mining, and remote-site projects.

## The Problem

When the Frederick Irwin Anglican School in Mandurah encountered challenges with stormwater retention, a quick and effective solution was required to keep the project on track.

The initial specifications presented challenges due to site constraints and delivery delays, leading Ocean Edge Plumbing to seek a more flexible and timely alternative. Their choice? Coerco's Flo-Vault Stormwater Retention System. This collaboration is a testament to how Coerco's tailored solutions can seamlessly adapt to project demands, ensuring results without compromise.

## The Solution

Coerco's Flo-Vault system was selected for its exceptional versatility and efficiency. The modular design allowed the solution to be tailored specifically to the reconfigured site layout, addressing retaining wall constraints while maintaining the project timeline. The ease of installation further cemented its suitability for the job.

The system's user-friendly design enabled a small team to complete most of the installation within a single day, saving both time and labour costs. Coerco's ability to provide an adaptable and high-performing solution ensured that the school's stormwater management needs were met efficiently and effectively.

## Summary

### Location

Frederick Irwin Anglican School,  
Mandurah WA

### Client

Ocean Edge Plumbing & Gas
