

# SAGGERS GROUP PARTNERS WITH COERCO FOR RELIABLE WASTEWATER SOLUTIONS

## Client Profile

Saggers Group, a leader in wastewater treatment and civil construction, was formed from the 2025 merger of Prestige Group WA and Dunny Doctor/Mandurah Liquid Waste. The company provides a complete suite of wastewater management services, from installation and maintenance to liquid waste disposal, serving a broad area across Western Australia.

## The Problem

As Prestige Group WA (now Saggers Group) grew, so did its demand for reliable wastewater treatment systems. The company needed a partner capable of delivering high-quality systems, providing efficient delivery and responsive technical support, accommodating both residential and large-scale commercial installations, and ensuring compliance with Department of Health regulations.

## The Solution

Saggers Group has been working closely with Coerco's wastewater division to install and maintain high-performance ATUs for both residential and commercial projects.

Why Coerco? Key Advantages for Saggers Group

- Proven Quality & Compliance
- Scalability & Growth Support
- Seamless Installation & Technical Backup
- A Future-Ready Partnership

## Summary

**Client**  
Saggers Group

**Products Used**  
Aerobic Treatment Units

*"We started out small with residential units, but as we grew, we needed a supplier that could scale with us. Coerco has provided us with the products, service, and backup we needed to confidently take on larger commercial projects."*

*— Brad Saggers, Saggers Group*
