

MULTI-PURPOSE WATER TRAILER FLEET FOR KENNARDS HIRE

Client Profile

Kennards Hire, a for-hire company that specialises in providing a wide range of rental equipment aimed to deliver a multi-purpose trailer that can perform several industrial applications.

The Problem

Kennards was on a mission to find a manufacturer to help build a fit-for-purpose trailer. The trailer needed to be durable and adhere to stringent safety standards of multiple civil construction sites.

The Solution

Coerco equipped the Kennards trailers with specialised 1000 Liter red water tanks mounted on Coerco's well-renowned heavy-duty galvanized trailer chassis to support the Australian pumps with a 7 HP Yanmar Diesel Firefighter Pump Electric Start, the rear-mounted 30-meter 25 mm firefighting hose reel for washdown and firefighting, the lockable battery isolator switch to prevent battery drain when not in use for long periods, and the emergency stop button to quickly shutdown equipment in the event of an emergency

Summary

Location

Perth, Western Australia

Client

Kennards Hire
